## ORGANIZATION OF THIS DOCUMENT

The authorized resource lists for Knowledge and Employability courses are organized by subject/occupational strand. The lists are organized as follows:

### Authorized Resources Listed by Subject (Grades 8–12)

Student Basic Resources are listed alphabetically within each grade, followed by Student Support Resources and Teaching Resources. Each entry provides the following information:

- series name (if applicable)
- title of resource
- authorization category (student basic, student support, teaching)
- grades authorized for
- vendor/distributor name, order number and price
- other Knowledge and Employability subjects authorized for (if any).

### Annotated Bibliography Listed Alphabetically by Title

Each of the resources listed has a corresponding annotation. Each annotation page identifies the:

- series name (if applicable)
- title of resource
- type of resource—the annotation has an icon of the type of the resource (e.g., print, video, CD-ROM)
- authorization category (student basic, student support, teaching)
- grades authorized for
- subjects authorized for
- vendor/distributor name, order number and price.

# RESOURCE AUTHORIZATION CATEGORIES

## Knowledge and Employability Resources

The resource lists for Knowledge and Employability courses contain learning and teaching resources that have been authorized for use in Alberta schools.

Alberta Education selects and authorizes resources to support the implementation of programs of study. Teachers are encouraged to select resources that meet the diverse learning needs of students they teach. The resource authorization categories are **student basic**, **student support** or **teaching**:

**Student Basic** learning resources are those student learning resources authorized by Alberta Education as the most appropriate for addressing the majority of outcomes of the course(s) or substantial components of the course(s); or the most appropriate for meeting general outcomes across two or more grade levels.

**Student Support** learning resources are those student learning resources authorized by Alberta Education to assist in addressing some of the outcomes of the course(s) or components of the course(s); or to assist in meeting the outcomes across two or more grade levels.

**Teaching** resources are those teaching resources identified as the best available resources to support the implementation of programs of study and courses; they may be teacher guides to accompany student resources or teacher professional resources. The authorized teaching guides are listed with the student resources.

These resources are organized by grade, authorization status and title in alphabetical order. Series names are italicized. Grade level(s) are indicated beside each title and there is a cross-reference column to other Knowledge and Employability subjects on the right side of the page.

### Note:

Alberta Education strongly recommends that teachers read all selections in the student resources and all activities in the teacher guides prior to using them with students. Careful consideration should be given to the sensitivities of both the student audience and the community, and to the reading levels of students.

## Knowledge and Employability Resource Lists

The authorized resource lists for Knowledge and Employability courses are organized by subject and occupational strand. In addition to the stated subject area, each list will include Career Awareness and Universal Strategies. The following lists are available.

### Academic Subjects

- English Language Arts (including the Career Awareness and Universal Strategies sections)
- Novels and Nonfiction
- Mathematics (including the Career Awareness and Universal Strategies sections)
- Science (including the Career Awareness and Universal Strategies sections)
- Social Studies (including the Career Awareness and Universal Strategies sections)

### Occupational Strands

- Art/Design and Communication (including the Career Awareness, Universal Strategies and Workplace Readiness sections)
- Auto Mechanics (including the Career Awareness, Universal Strategies and Workplace Readiness sections)
- Business Services (including the Career Awareness, Universal Strategies and Workplace Readiness sections)
- Construction: Building (including the Career Awareness, Universal Strategies and Workplace Readiness sections)
- Construction: Metal Fabrication (including the Career Awareness, Universal Strategies and Workplace Readiness sections)
- Cosmetology (including the Career Awareness, Universal Strategies and Workplace Readiness sections)
- Fabrics (including the Career Awareness, Universal Strategies and Workplace Readiness sections)
- Foods (including the Career Awareness, Universal Strategies and Workplace Readiness sections)
- Horticulture (including the Career Awareness, Universal Strategies and Workplace Readiness sections)
- Human Care (including the Career Awareness, Universal Strategies and Workplace Readiness sections)
- Workplace Readiness (including the Career Awareness and Universal Strategies sections)

In addition to the printed lists, you may wish to consult the Authorized Resources Database at <http://education.alberta.ca/apps/lrdb/> or the Knowledge and Employability Studio at <http://www.learnalberta.ca/content-teacher/kes/index.html?launch=true>.

\* These strands have been replaced by the single strand Construction at the junior high school level.

\*\* Students who successfully complete Construction: Building 10-4 may take Construction Systems 20-4.

## Availability

Most of the new Alberta resources are available for purchase from:

Learning Resources Centre (LRC)  
12360 – 142 Street, Edmonton, AB T5L 4X9  
Telephone: (780) 427-5775  
Fax: (780) 422-9750  
Internet: <http://www.lrc.education.gov.ab.ca>

LRC order numbers and prices (as of the printing of this booklet) are included for each resource.

Those resources that must be purchased directly from the vendor/distributor are so noted on the authorized list and on the annotation. A listing of vendors/distributors is provided at the end of this booklet.

## Authorized Knowledge and Employability Resources

**Note:**

For a **complete** list of Knowledge and Employability resources, consult the Learning Resources Centre *Alberta Resources Catalogue*. Some of the older resources will be withdrawn from authorized status in the year(s) ahead.

*The Alberta Framework of Essential Competencies for Working, Learning and Living*  
**• Alberta Framework of Essential Competencies for Working, Learning and Living: Action Planner and Framework**

Teaching Resource Grade(s) 8, 9, 10, 11, 12  
 Mathematics 10-4 / 20-4

English Language Arts	Mathematics ✓	Science	Social Studies	Occupational Courses	Career Awareness	Universal Strategies
-----------------------	---------------	---------	----------------	----------------------	------------------	----------------------

The *Alberta Framework of Essential Competencies* consists of a set of essential competencies (skills, knowledge and work effort) that promote success in everyday living. The folder also includes information that explains the framework and how it can be used. The competencies are organized into four dimensions: Building Personal Capacity, Interacting and Communicating, Planning and Managing, and Using Data and Computer Technology. Within each dimension there are two sub-competency areas; e.g., Building Personal Capacity is divided into Personal Management and Managing Transitions. The other sub-competency areas are Working with Others, Communicating (including ESL and literacy), Thinking, Achieving Results, Numeracy, and Computer Technology. Each competency has five performance indicators that can be taught and learned, and the outcome observed. An individual can start where he or she is and progress as he or she wishes. The individual competency statements are intended to be incorporated into new and existing curricula. The accompanying CD-ROM *Action Planner* is a Word document that encompasses the competencies and a self-assessment form that teachers may use with students in part or in whole to identify strengths and opportunities for growth.

**Comments:**

- Most of the competencies included in the Framework are not ones that people are usually hired for, but many are ones that people are often fired for lacking.

Basic / Teaching Resource    Grade(s) 9

English Language Arts	Mathematics	Science	Social Studies	Occupational Courses	Career Awareness	Universal Strategies
	✓					

This resource consists of a teacher's edition, student text and teacher's resource library CD-ROM. For each lesson, the teacher's edition shows an illustration of the student text pages and a summary of the lesson. A warm-up activity, mathematics vocabulary and a suggestion for teaching the lesson are also included. A Learning Styles section provides tips on teaching students who have different learning styles. In the Community, At Home and Career Interest Inventory sections include ideas for class discussion of real-world applications for the various mathematics operations. It also points out a variety of common errors made by students, technology connections and mental mathematics challenges. The alternate activities that correspond with the lesson are illustrated on the same page as the lesson. Alternative assessments using a variety of media provide for assessment of a broad range of knowledge, skills and attitudes.

The student text is divided into 13 chapters: Whole Numbers; Number Theory; Fractions; Decimals; Ratio and Proportion; Percent; Introduction to Geometry; Metric Measurement; Customary Measurement; Measuring Circles, Cylinders, and Time; Graphs; Scale Drawing; and Introduction to Algebra. The lessons are clearly defined with a bold heading on the top of each page. There are adequate student practice exercises.

The teacher's resource library CD-ROM includes mastery tests for each chapter, a midterm test and a final test. It also includes a set of blackline masters that cover the same content as the regular activities, but are written at a lower grade level. The answers to the assessments on the CD-ROM are given in the teacher's edition.

**Comments:**

- Many pages of practice are included without providing a context. Teachers will have to modify these to include a context that is relevant to their students' experiences.
- The student text is relatively text-heavy. Some sections are not part of the Knowledge and Employability Mathematics course, while the Statistics and Probability Strand is not covered.
- At various places in the teachers' resources, references are made to an "Online Connection." Alberta Education does not review or authorize these Web sites. Teachers are encouraged to preview these Web sites before allowing their students to use them.

English Language Arts ✓	Mathematics ✓	Science ✓	Social Studies ✓	Occupational Courses	Career Awareness ✓	Universal Strategies ✓
-------------------------	---------------	-----------	------------------	----------------------	--------------------	------------------------

This teacher professional resource offers a collection of classroom teaching strategies that can be applied to a variety of subject areas. The resource describes over 45 different strategies, providing step-by-step instructions on how to use them, as well as examples, variations and advantages of each. The book addresses cognitive processes, such as activating/focusing, selecting/organizing and integrating/applying. It also examines a variety of text frames, such as cause/effect, concept/definition, problem/solution, compare/contrast and proposition/support. A section on student activities addresses developing vocabulary, brainstorming ideas, learning cooperatively, promoting discussion, encouraging writing and building study skills. This section also promotes interactive reading and graphic representation of thoughts and ideas.

-------------------------	---------------	---------	----------------	----------------------	------------------	----------------------

*Consumer Mathematics* is developed for senior high students who have a basic grasp of mathematical computation, but require additional practice in a real world context. This resource provides students with the tools they will need to function in the home, workplace and community. The following strands are covered throughout the resource: Number Concepts and Operations, Shape and Space and a portion of the Statistics and Probability. *Consumer Mathematics* is developed in a straightforward manner for both the student and teacher. The resource gives various examples and topic/concept extensions which extends student learning beyond the classroom. Teachers can use the student workbook or the Teachers Resource library (same topics, but at a lower reading level) to find backbone masters and the Skill Track software to track individual student progress.

**Comments:**

- Additional resources are identified in this resource, but have not been reviewed or authorized by Alberta Education.
- This resource contains American content (focuses on the imperial units of measurement). Teachers should supplement these sections with metric system examples.

*Essentials of Mathematics 10* covers relevant topics in six chapters, using a variety of everyday and work-related mathematical problems and operations. Chapter headings include Wages, Salaries and Expenses, Personal Banking and Consumer Decisions. The focus is on the application of basic mathematics in everyday situations. This resource contains a variety of activities, samples of real life forms and other student tools, applications using technology, and teacher/student assessment tools and strategies. The resource integrates activities and expectations at school, at home, at the workplace and in the community. *Essentials of Mathematics 10* contains photographs, tables, charts, graphs and other visuals that are appropriate for high school students. Each chapter also includes career connections, hints for completing mathematical operations, mental math activities, problem-solving analysis and games. Projects and other activities encourage teamwork.

**Comments:**

- Metric (SI) and Imperial measurement systems are addressed.

*Essentials of Mathematics 11* covers Number Concepts, Measurement, and Statistics and Probability in the Grade 11 Knowledge and Employability Mathematics course. Content includes the following chapters: Income and Debt; Data Analysis; Owning and Operating a Vehicle; Measurement and Technology; Relations and Formulas; Applications of Probability; Personal Income Tax; and Preparing a Business Plan. Each lesson includes a suggested Chapter Project section as well as a Notebook Assignment section that provides exercises and problems for students to copy and complete in their notebooks. Career connections interspersed in the text provide information on such topics as job titles, current wages, career goals, suggested keywords for further career-related research and potential follow-up activities. Connections to everyday and real-life applications are provided. The resource has an appropriate format and reading level for most students in Knowledge and Employability courses.

The Teacher Resource Book provides chapter planners that suggest the lesson focus, project activities, materials required and estimated time for a lesson. Included with the lesson are Materials and Resources, Instructional Strategies, Project Activities, Assessment Strategies and Solutions. Appendices provide further information on Instructional Strategies, Assessment Rubrics and blackline masters.

**Comments:**

- The resource is weak in 3-D Objects/2-D Shapes, Patterns and Relations and includes content that is not part of the Alberta mathematics curriculum.

The opening section of this resource provides insight into the characteristics and needs of low achieving mathematics students. The remainder of the resource provides a variety of games and activities for teaching students about place value, measurement, numbers and operations, common fractions and money. The rationale for each activity is provided, along with clear instructions and a list of required materials. The activities relate to meaningful, everyday experiences for students. Each activity is success-oriented, thereby promoting student self-confidence. The first section of the resource could be used as an inservice for mathematics teachers.

**Comments:**

- Time is required to make/gather the necessary materials for the activities.

### How to Assess Authentic Learning (4th Ed.)

Teaching Resource Grade(s) 8, 9, 10, 11, 12  
 Mathematics 10-4 / 20-4

English Language Arts ✓	Mathematics ✓	Science ✓	Social Studies ✓	Occupational Courses	Career Awareness	Universal Strategies
-------------------------	---------------	-----------	------------------	----------------------	------------------	----------------------

This teacher professional resource explores various alternative forms of assessment, providing the rationale and background for each. By incorporating the assessment tools suggested, teachers can promote strategies for student learning. The resource provides instructions on how to produce personal assessment tools and gives valuable examples of each. It deals with a variety of assessment methods, including learning standards, standardized tests, teacher-made tests, rubrics, portfolios, metacognitive reflection, observation checklists, graphic organizers and interviews. The 4th edition includes some new examples of rubrics, updated research on assessment, more emphasis on standards and more special education examples.

English Language Arts ✓	Mathematics ✓	Science ✓	Social Studies ✓	Occupational Courses ✓	Career Awareness ✓	Universal Strategies ✓
-------------------------	---------------	-----------	------------------	------------------------	--------------------	------------------------

The Knowledge and Employability Studio is the online guide to implementation for the Knowledge and Employability courses. There are four levels in the Studio. The Main Lobby contains program updates, contact information, a video introduction and a virtual tour of the Studio. New update information is displayed on the screen in the lobby. Curriculum Foundations, found on Level 2, contains activities and strategies to support teachers and students with the implementation of four core subjects: English language arts, social studies, science and mathematics. Click on the title of the course for further information. Within each subject are folders that contain resources aligned with the program of studies outcomes within that subject area. Level 3 contains information on each of the occupational strands. Poster-like artwork displays the names of each strand. In the same manner as the second level, each icon, when opened, illustrates a collection of activities and strategies aligned with the program of studies outcomes within each occupational strand. Workstations for administrators, teachers, students, parents and industry are found on Level 4. The folders and resources function in the same manner as the other levels but reveal learning and teaching resources to support teachers, students and parents. The Administrators Workstation contains the *Information Manual for Knowledge and Employability Courses*. The Industry Workstation contains information for employers working with students in off-campus situations.

Life Skills Math deals with the basic outcomes identified in Knowledge and Employability junior high school mathematics. This resource teaches students basic math skills needed for everyday living. Some of the topics covered are adjusting recipes, fractions in the home, spending and earning money, using percents and working with interest. The resource provides various examples and topic/concept extensions that extend student learning beyond the classroom and into the home, workplace and community. The resource is logically organized and user friendly. Teachers can use the student workbook or the teacher's resource library (same topics, but at a lower reading level) to find blackline masters. The skill track software tracks individual student progress.

**Comments:**

- Additional resources are identified in this resource, but have not been reviewed or authorized by Alberta Education.
- This resource contains American content (focuses primarily on imperial units of measurement, although some references to metric units are mentioned). Teachers may wish to substitute Canadian examples and/or supplement the resource with Canadian materials.

This resource provides hands-on suggestions for teachers to use when explaining the processes of adding, subtracting, multiplying and dividing with whole numbers; adding and subtracting integers; calculating using decimals, fractions and percents; measuring (including area and perimeter); calculating probability; and classifying shapes. The resource includes clear activities that demonstrate to students why math works the way it does. These activities are particularly useful for students who need to understand the process before they can perform it.

**Comments:**

- The resource is best suited for teachers of junior high Knowledge and Employability students, but the techniques would be appropriate for students of any age who lack an understanding of basic math processes.

This visually appealing Canadian text helps older students in Knowledge and Employability to learn the math they will need in everyday life. The resource focuses on practical issues related to employment earnings, income tax, purchases, credit cards, banking, investing, travel and purchasing a car. Topics are introduced using interesting, everyday situations to generate and sustain interest. Most topics covered relate to working with money, decimals, percents and ratios. Chapters in the teacher's guide parallel those in the student text, with each chapter outlining what students are expected to learn. The guide includes exercises and accompanying blackline masters, career information, chapter reviews, chapter tests and assessment plans for each chapter. It also suggests accommodations for students with special needs.

- Comments:
- The text does not address mathematics outcomes related to variables, equations, measurement, 3-D objects, 2-D shapes, transformations, statistics or probability.

*Numeracy at Work* is a collection of examples describing how mathematics is used in a selected sample of Canadian employment opportunities. The resource addresses the quantitative skills needed to complete tasks, acknowledging that these quantitative skills are used in conjunction with other essential skills. The binder includes the following sections: Money Math, Scheduling, Budgeting and Accounting, Measurement and Calculation, Data Analysis, and Numerical Estimation. Foundational mathematics skills, authentic applications and work-based examples are provided in each chapter. Each chapter also includes a series of activities that reviews and reinforces the skills taught in that chapter, as well as answers for the activities.

- Comments:
- The reading level of this resource ranges from Grade 7 to Grade 12, making it appropriate for use with teacher assistance.

*Pacemaker Basic Mathematics* is an effective resource for the Grade 8 Knowledge and Employability Mathematics course. This resource has many useful components, including a basic student textbook at an appropriate reading level, Teacher's Planning Guide, a student workbook with extra practice questions and a Classroom Resource Binder containing blackline masters. The Teacher's Planning Guide contains numerous suggestions for cooperative learning strategies, enrichment activities and alternative assessment. The student textbook includes sections called Math in Your Life and On-the-Job Math that provide real-life contexts for learning.

**Comments:**

- This resource contains American content that teachers may wish to replace or augment with appropriate Canadian content.
- The use of commas rather than spaces to separate numbers is not consistent with Canadian usage.
- This resource includes sections that are not part of the Knowledge and Employability Mathematics course.

*Radical Math* is the 2001 Millennium volume in the Box Cars & One-Eyed Jacks series of educational games. The resource consists of 100 games that engage students in enjoyable, hands-on learning experiences using cards, regular dice and special dice. The games are designed to help students learn basic mathematics skills related to whole numbers, decimals, integers, fractions, ratios and percents. There are several games to choose from in each category.

**Comments:**

- Some of the games are beyond the scope and level of Knowledge and Employability.
  - Teachers will need to clearly link the games to the Knowledge and Employability Mathematics learning outcomes.

*Read to Live* provides information, strategies and activities that teachers can use to engage and support students who are experiencing difficulties with reading. The focus is on helping students think about reading in a new way by connecting classroom experiences with students' lifeworlds.

This resource, which is a series of workshops to enhance student literacy at the junior and senior high school levels, is intended for teachers who are new to teaching, new to teaching students with reading difficulties or just looking for extra support. It can also be used by more experienced teachers to mentor colleagues and create a community of practice.

The first workshop, **Introduction: Responsive Teaching**, describes an approach to teaching reading that focuses on addressing students' unique learning needs. This is followed by three more in-depth workshops, which explore different elements of reading: **Contexts of Reading**, **Active Reading** and **Multiple Texts/ Multiple Literacies**. Each of these workshops contains three sections: Background, Reading Strategies and Teaching Strategies.

The workshops can be explored in multiple sittings, in whatever way is most useful. Teachers can explore the information in any order; however, teachers new to teaching reading or to the concepts covered may find it most useful to start with the Background.

#### **Background**

The background section summarizes important concepts, research findings and other information on the topic. Links provide further information on relevant theorists and researchers.

#### **Reading Strategies**

The reading strategies section offers sample strategies teachers can model, teach and reinforce to help students become more effective readers. These strategies apply and build on the concepts in the background section.

#### **Teaching Strategies**

The teaching strategies section provides sample instructional strategies and activities teachers can use to strengthen students' understanding and motivation.

-------------------------	---------------	-----------	------------------	------------------------	--------------------	------------------------

The *Workplace Health and Safety Teacher Resource Binders* and *Teacher Toolkit* were developed as a joint initiative by Alberta Education and Alberta Human Resources and Employment to support teachers in the delivery of workplace health and safety outcomes. The resource actively promotes the safety of all workers in Alberta, particularly young workers, and documents Alberta health and safety legislation and regulations. Students will become aware of their rights and responsibilities with respect to workplace health and safety concerns.

The two-binder set of workplace health and safety information is divided into seven chapters: legislation, health and safety management systems, physical hazards, chemical hazards, biological hazards, psychosocial hazards and ergonomics. Each chapter includes topic-specific content that is followed by a supplemental information section with course-specific, industry-specific or occupation-specific information. Teacher notes, handouts, overheads and additional resources are also included with each chapter. The accompanying *Workplace Health and Safety Teacher Toolkit* complements the resource binders with posters, publications, cards and CDs. The toolkit is organized into nine sections: statistics, videos, posters, cards, publications, general, employment and standards information, workers' compensation information and other.

**Comments:**

- This resource has the potential for transfer to any school or workplace setting.
  - The resource contains reference to a workplace fatality (page 12 of the legislation section) that was widely reported in the Alberta media. Teacher judgement is advised in the use of this reference as students who knew the deceased or were related to him might be in the classroom.
